Language

English

Romanian

Experience

2024 - Present
Web Developer at E Pro Design
I am responsible for the development, design, and maintenance of websites.
My duties include implementing features, creating intuitive designs, and optimizing website performance. I work collaboratively with the team to create landing pages and complex web designs.

2021-2024 The Ministry of National Defence
Warrant Officer in Maritime Navigation
Managed navigation tasks and coordinated teams, utilizing expertise as an electrician technician to uphold electrical systems and navigation equipment, encompassing electronic components and onboard PC systems.

2017 - 2021 Restaurant: Fish & Wine
Cook
Monitored stock levels, ordered supplies, and managed inventory to minimize waste and maintain a consistent supply of fresh ingredients. Collaborated closely with kitchen personnel to facilitate seamless operations, particularly during peak periods.

2016 - 2017 The Music Pub
Junior Cook
Assisted the head chef in swiftly preparing ingredients and cooking meals within a fast-paced setting. Interacted with patrons to cater to specific requests and dietary requirements, thereby enhancing their dining satisfaction.

Projects

E-comerce site NexShop-clothes
A ReactJS web app for clothes built with advanced technologies like React, Redux, TypeScript and Redux Saga.

RoboFriends
RoboFriends: A ReactJS web app offering dynamic bot search and responsive design using React, React DOM, Javascript.
